

What is telemedicine?

Telemedicine is the use of secure audio and video technology to provide care to patients in the comfort of their own home.

Benefits of telemedicine

- ✓ No need to travel to appointments
- ✓ Avoid risk of exposure to illness
- ✓ Eliminate child care issues
- ✓ Refill medications, prescribe new meds, order labs or other tests

Arizona Community Physicians is excited to roll out a new way to provide services to the patients we care for!

A video appointment using **Doxy.me** allows your provider to continue to care for patients in-person while still providing the flexibility and convenience of seeing patients remotely for follow up visits, check-ups, and education when appropriate or necessary.

With doxy.me there is no need to download software or register for an account. Simply use a computer or other device with a camera and microphone to securely connect with your provider to discuss your medical needs.

Contact your ACP medical office to schedule your video appointment today.

How it works

- Schedule your video appointment with the ACP front office staff
- Look out for an email communication with a doxy.me link
- Sign in to doxy.me with your smart device or computer with audio and microphone enabled using Google Chrome
- Be prepared to communicate with your provider

Testimonials

"I love the ease and simplicity of Doxy.me. I have really enjoyed having the option to meet with my provider from my home. It saves me a lot of time not having to travel to her office." - Jodi W.

"I can't believe how easy it was to meet with my provider. I'm not very technically savvy and Doxy.me was extremely easy to use. It's amazing to meet with my provider at home." - Hilda S.
